

ADITYA DAS SARMA

Curriculum Vitae

aditya.41200@gmail.com ◇ github.com/adi666-png ◇ adi666-png.github.io

EDUCATION

Jadavpur University

2019 - Exp. 2023

Bachelor of Engineering, Electronics & Telecommunications

CGPA: 9.56/10 (till 6th Sem)

TECHNICAL SKILLS

• C/C++ • Python • Qiskit • PennyLane • DWave Ocean SDK • MATLAB • PyTorch • Bash

DOMAIN INTERESTS

- Solving problems in machine learning and optimization using quantum gate based and annealing approaches
- Optimizing software stack for quantum computers & Optimal synthesis and compilation of Quantum Circuits
- Architectures for Quantum Computing & Efficient simulation of quantum circuits using Tensor representations

RESEARCH EXPERIENCE

Tensor Ring Representations for Quantum Circuits

Sep '22 - Present

Supervised by *Dr. Debanjan Konar & Dr. Vaneet Aggarwal*

CLAN Labs, Purdue University

West Lafayette, USA

- Working on using Tensor Rings to **compress input quantum state** for mitigating scalability issues.
- We show that this **approximation scales linearly** with storage and computational time required.

Quantum Kernel Ridge Regression

Jun '22 - Sep '22

Supervised by *Dr. Attila Cangi*

Helmholtz-Zentrum Dresden-Rossendorf Labs

Dresden, Germany

- Selected as a Summer Intern out of the 30 successful applicants out of a pool of 350 international students.
- Developed **quantum kernels** for predicting density and total energy of Beryllium atoms.
- Proposed **quantum kernel outperformed RBF kernel** by two orders of magnitude and gave comparable results to the state of the art neural network models.

Efficient Implementation of Shor's Algorithm

Mar '22 - Present

Supervised by *Dr. Anupam Chattopadhyay*

Temasek Labs, Nanyang Technological University

Singapore

- Implementing an alternate version of the Ekera-Hastad Algorithm by proposing a novel **genetic algorithm** based approach to the Bounded Distance Decoding Problem.
- Working on potential optimizations to the quantum modular exponentiation circuits.

Hybrid Quantum Spiking Neural Networks

Jun '21 - May '22

Supervised by *Dr. Debanjan Konar & Dr. Attila Cangi*

Center for Advanced Systems Understanding

Görlitz, Germany

- Implemented novel hybrid model by integrating VQCs with spiking neural networks in **PennyLane**.
- Reported **increased noise robustness** against classical counterparts of these ML architectures.
- Extended this work to create a **hybrid quantum model of Random Neural Networks**.

Supervised by *Dr. M Girish Chandra*

TCS Innovation Labs(Research)

Bangalore, India

- Extended **QUBO** formulation with a **classical post-processing strategy** for decoding LDPC codes.
- Implemented a complete simulation of a communication system in **Python** under different channel noises.
- Achieved **lower BER** using new formulation in **Ocean SDK** than classical algorithms in **MATLAB**.
- Worked on a **QUBO** for **quantum enhanced SVM** for detecting **BPSK** symbols and ran it on DWave Annealer, which gives **slightly improved results** over classical SVM.

Explorations in Quantum Applications & Simulation

Sep '20 - Present

Supervised by *Dr. Amlan Chakrabarti*

A.K.Choudhury School of Information Technology, University of Calcutta

Kolkata, India

- Utilized **Grover Adaptive Search**, implemented in **Qiskit**, to successfully arrive at correctly decoded codewords with high probability.
- Worked on **fixing bugs** and **pipelining issues** in a boolean logic based quantum simulator (written in C++) under the co-supervision of Prof Kenneth W Regan of SUNY Buffalo.
- Recently started working on **implementing modules for tensor computations for simulation of quantum circuits** as part of an indigenous quantum simulator project.

PUBLICATIONS

(* DENOTES ORAL PRESENTATION GIVEN BY ME)

- [1] **On Quantum-Assisted LDPC Decoding Augmented with Classical Post-Processing***
Aditya Das Sarma; Utso Majumder; Vishnu Vaidya; M Girish Chandra; A Anil Kumar; Sayantan Pramanik
(Accepted at the 14th International Conference on Parallel Processing and Applied Mathematics)
- [2] **A Shallow Hybrid Classical-Quantum Spiking Feedforward Neural Network for Noise-Robust Image Classification**
Debanjan Konar; Aditya Das Sarma; Soham Bhandary; Siddhartha Bhattacharyya; Vaneet Aggarwal; Attila Cangi
(Conditionally Accepted at Elsevier Applied Soft Computing)
- [3] **On Quantum-Enhanced LDPC Decoding for Rayleigh Fading Channels***
Utso Majumder; Aditya Das Sarma; Vishnu Vaidya; M Girish Chandra
(Accepted at ACM/IEEE International Workshop on Quantum Computing)
- [4] **LDPC Decoding with Ensembles of Quantum-enhanced Annealing-based Support Vector Machines (Poster)***
Aditya Das Sarma; Utso Majumder; M Girish Chandra
(Accepted at the 26th Conference on Quantum Information Processing(QIP))
- [5] **Deep Spiking Quantum Neural Network (DSQ-Net) for Image Classification in Noisy Environment**
Debanjan Konar; Aditya Das Sarma; Soham Bhandary; Siddhartha Bhattacharyya; Vaneet Aggarwal; Attila Cangi
(Accepted at 2023 International Conference on Quantum Computing and Communications (QCC))
- [6] **Random Quantum Neural Networks (RQNN) for Noisy Image Recognition**
Debanjan Konar; Erol Gelenbe; Soham Bhandary; Aditya Das Sarma; Attila Cangi
(Conditionally Accepted at IEEE Transactions on Emerging Topics in Computational Intelligence(TETCI))
- [7] **Maximum Likelihood LDPC Decoding Using Grover Adaptive Search-based Quantum Optimization**
Partha Acharya; Aditya Das Sarma; Utso Majumder; Amlan Chakrabarti
(Awaiting decision at 2023 IEEE International Conference on Communications (ICC))
- [8] **Quantum Kernel-integrated Ridge Regression for Workflow Modelling of Kohn-Sham Density Functional Theory (DFT)**
Aditya Das Sarma; Soham Bhandary; Lenz Fiedler; Debanjan Konar; Attila Cangi
(Under manuscript finalization stage)

PROJECTS

Quantum Machine Learning & Optimization for Finance

Sep '22 - Present

Supervised by: Dr Sergio Gago

Moody's Analytics, New York, USA

- Working on **portfolio optimization** using both analog and digital annealing strategies.
- Working on **pricing swaps and derivatives** and exploring **efficient encoding techniques**.
- **Successfully orchestrated a Memorandum Of Understanding(MOU)** between Moody's Analytics and University of Calcutta for establishing long term research relations.

A cloud-based distributed intelligent color measurement system for predicting the color purity of any object

Feb '21 - May '21

Supervised by: Dr Vaclav Snasel

VSB – Technical University of Ostrava, Czech Republic

- Aims to detect color purity of objects, especially crops to detect any infections. A neural network, trained and tested using **PyTorch** and hosted on **Heroku**, makes the prediction once the Raspberry Pi Zero device sends the color readings.
- Finalizing terms with a firm to **commercialize** the product.
- This work has been approved by the **German Patent Office** as a **Utility Model**.

SCHOLASTIC ACHIEVEMENTS

- Clinched an All India Rank of **208** in West Bengal JEE among 100k candidates
- Ranked **150** at state level to qualify for **final round of National Talent Search Examination**

LICENSES & CERTIFICATIONS

- **Utility Model license certification from German Patent Office**
 - **Link:** <https://drive.google.com/file/d/1aCajEXhxrnl55VYueDwMfJN5O6ofzJDk/view?usp=sharing>
 - **Link to Issuing Authority:** https://www.dpma.de/english/utility_models/index.html
- **C1000-112-ENU: Fundamentals of Quantum Computation Using Qiskit v0.2X Developer**
 - **Link:** <https://drive.google.com/file/d/13Vx07biEvscA-leGxuSfwWn4JBrGze5D/view?usp=sharing>
 - **Link to Issuing Authority:** <https://www.ibm.com/training/certification/C0010300>

COURSES UNDERTAKEN

- **Computer Science:** Data Structures & Algorithms, Digital Image Processing*, Operating Systems*, Advanced Algorithms *, System Software*, Computer Architecture & Organisation, C Programming & Numerical Methods, Microprocessors & Microcontrollers, Introduction to ARM7 Architecture*
- **Electronics & Telecommunications Engineering:** Circuit Theory, Queueing Theory, Random Graphs, Probability and Random Processes, Analog Circuits & Systems, Digital Circuits & Systems, Digital Signal Processing, Information Theory, Analog Communications, Digital Communications, Analog & Digital Control Theory, EM Theory, Antennas and Propagation, Microwave Engineering, Analog CMOS, VLSI Design and Algorithms*
- **Mathematics:** Calculus - I & II, Vector Calculus, Linear Algebra, Linear Transformations & Matrices, Special Functions, Abstract Algebra, Complex Analysis, Advanced Probability & Stochastic Process, Ordinary & Partial Differential Equations
- **Artificial Intelligence:** Pattern Analysis and Machine Intelligence*, Neuro-Fuzzy Control*

* indicates that the course is presently being undertaken or is scheduled for an upcoming semester
